

Đỗ Thông

Front-End Developer

✉ toilai28@gmail.com ☎ (+84) 764 316 169 📍 Tan Binh District, Ho Chi Minh City

ABOUT

Current stack: React/Next, Material UI/Tailwind, Recoil/Tanstack Query, Git, Jest, Storybook. 6+ YoE.

WORK EXPERIENCE

SoA

5/2024 - 5/2025

● Senior Front-End Developer

- Main tech stack: TypeScript, React/NextJS, Recoil/Jotai, Tanstack Query, Material UI, OAuth, Firebase, GraphQL, NodeJS (Express), Storybook, Jest
- Main responsibilities:
 - Led the design and development of scalable, maintainable frontend architectures
 - Gathering, analyzing requirements with both the customers and the team
 - Guided and collaborated with 2 frontend engineers, promoting best practices through regular code reviews and standardized development guidelines
 - Analyzing and integrating daily/weekly requirement changes directly from the customers
 - Implemented reusable component libraries and design systems to improve development speed and UI consistency across multiple products
 - Implemented data fetching, schemas and optimize queries using GraphQL with backend developers
 - Optimized frontend performance by applying techniques such as lazy loading, memoization, virtual scrolling
 - Ensure responsiveness across platforms
 - Experience with Node.js for SSR, custom tooling, and integration testing in frontend workflows
 - Doing integration testing, E2E testing and smoke testing
 - Maintain CI/CD pipelines to automate builds, tests, and deployments
 - Contributed to product roadmap planning by providing technical input on feasibility, estimation, and risks

priint Group

5/2022 - 5/2024

● Senior Front-End Developer

- Main tech stack: TypeScript, React, NextJS, Recoil, Zustand, Material UI, OAuth, Keycloak, Storybook, Playwright, Docker, Gitlab
- Main responsibilities:
 - Led a few Content Management System projects
 - Supervised a team of 3 frontend engineers, conducted code reviews, and established coding standards
 - Gather and analyze requirements
 - System design
 - Breaking down tasks
 - Config UI design system for both old and new codebases
 - Handling authentication flow and ensure CSRF policies
 - Handling roles and rights
 - Integrating CRUDs
 - Handling real-time notifications for uploading and rendering service

- Optimizing code using lazy loading and virtualization
- Writing unit tests
- Writing YAML and messing with k8s to create and maintain CI/CD pipelines on Gitlab
- Writing documentation
- Developed a VSCode extension for internal developers and customers to modify XMLs with hundreds of thousands of entries, generating code templates, encrypting and decrypting private code, adding user requested and quality of life features, and improving performance over the company's older Java application

Sutrix Group

8/2020 - 5/2022

● *Front-End Developer*

- Participated in both developing e-commercial and content management systems
- Main tech stack: React, Redux, Vue, Material UI, Tailwind, Cypress
- Main responsibilities:
 - Developing CRUDs and location-related components (map locator for e-commerce sites)
 - Handling and integrating real-time chat systems
 - Writing unit tests
 - Planning and holding meetings, resolving communication issues for absent project managers

VietCAS

7/2019 - 7/2020

● *Junior Front-End Developer*

- Worked on a healthcare managing system
- Main tech stack:
 - React
 - Redux
 - Tailwind
- Main responsibilities:
 - Integrating real-time video consulting
 - Developing medicine order system
 - Developing patient's history system

Blocky

10/2018 - 6/2019

● *"Full-Stack Developer"*

- Developed a shoe care commercial site.
- Main tech stack: React, Bootstrap, Javascript, Firebase Firestore
- Main responsibilities:
 - Handling inventory management
 - Handling payment authorization
 - Handling database transactions

ACADEMIC BACKGROUND

Hoa Sen University

10/2016 - 7/2020

● *Bachelor of Computer Science*

CERTIFICATES

2015

IELTS 7.0 (IDP)

2023

Deutsch A2 (DZ)
