## Education

2019-2023

University of Westminster

BEng (Hons) in Software Engineering  
- First Class

2016-2018

St. Jhon's College

G.C.E Advance Level - (Bio Stream)

## Achievements

- All island Sirimavo Bandaranaike 100th birth memorial oration competition 2nd runner-up.
- Participated in Google summer code hackathon (2021).
- YMCA oratorical competition provincial champion (2019)
- Toastmaster pathway level 01 and level 02 completed.

## Certificates

2020- 12 Completed Java application development using Java SE certificate course conducted by University of Colombo School of Computing.

2021- 06 Completed hackerrank basic certification in python, java, SQL.

2021 – 06 Completed hackerrank intermediate certification in SQL.

2021- 06 Completed Practical Web Development: 22 Courses in 1 in Udemy (certificate- <https://cutt.ly/knjA6nU>)

2021- 03 Completed digital marketing fundamentals masterclass conducted by IIDE India.

2021- 05 Completed Learn machine learning in 21 days certificate course done in Udemy (certificate - [shorturl.at/muBD6](https://shorturl.at/muBD6))

## Projects

### Sand Dollar

Central Bank Digital Currency System (CBDC) which built to make the online based currency storing digitalisation of physical money. The main frameworks I used in this project are Java, Node Js, React and Spring boot

### IMI

It's E-procurement application which is built using the .net core and angular as technology tools with IFS integration and MSSQL as the database. I worked on this project as a full stack developer where I used the programming languages like C#, HTML, JavaScript, CSS.

### GREBO 365 E-Commerce Application

An E-commerce application where node js was used for the backend and Next.js used for the front end with the react components in it with a react admin panel. Mongo DB was used as the database.

### GAME JURY

An NLP project which built to aggregate the reviews based on topic modelling and sentimental analysis. In this project angular used as the frontend framework and for the backend got to use the AWS serverless architecture. For the database Dynamo DB is used for this project.
