### Summary

---

Results-driven Backend Developer with a strong foundation in Ruby programming. Demonstrates a commitment to creating efficient, scalable backend systems while continuously enhancing skills, seeking opportunities to leverage expertise in a collaborative development environment.

I can also work with Javascript, but I'm not strong and do not have much knowledge about the language. However, I think I can adapt to almost all the work required.

I'm always looking for new job opportunities and challenges so if you think I'm suitable for your requirement, please don't hesitate to contact me anytime, and thank you for taking time with my resume.
