Eyepax

12 years 10 months

Delivery Unit Head

July 2021 - Present (4 years 2 months)

Colombo, Western Province, Sri Lanka

Currently work in a capacity of Delivery unit Head by handling:

- Client Relationship Management: manage relationships with clients across the USA, UK, Australia, New Zealand, France, Sweden, and Singapore, ensuring consistent communication and satisfaction.
- Team Leadership: Lead multiple technology teams, including Technical Leads, Software Engineers, QA Engineers, and Project Managers, fostering collaboration and high performance.
- Project Management: Develop and maintain project schedules and resource plans, monitoring progress against these plans throughout the project lifecycle.
- Financial Oversight: Manage revenue and profit margins with consistent weekly reporting, ensuring projects are delivered on time and within budget.
- Quality Assurance: Ensure timely, budget-compliant, and high-quality deliverables, guiding teams through training, appraisals, and development to enhance performance.
- Stakeholder Communication: Proactively communicate with stakeholders to identify issues, create solutions, and improve efficiency.
- Risk Management: Identify and manage risks by establishing mitigation and contingency plans with actionable items.

Issue Resolution: Handle escalations, provide solutions, and conduct root cause analysis to prevent future issues.

- Requirements Management: Manage customer requirements while adhering to best practices and processes for integrated solutions.

- Pre-sales Activities: Define project scope, prepare estimations and milestones, and manage all aspects of the project business plan and budget.

- Recruitment Support: Conduct final interviews and prepare job requirements to support the recruitment process.

Senior Tech Lead

July 2019 - July 2021 (2 years 1 month)

Colombo, Western Province, Sri Lanka

- Managed team with 20+ including Software Engineers, QA Engineers, and Project Manager.
