

WhatsApp API documentation

This API allows initiating chat, chatting with chat_id, getting chat history and listening for webhook.

Authentication

All endpoints require an API key sent via request header.

x-token: <YOUR_API_TOKEN>

Key	Value
x-token	<YOUR_API_TOKEN>

Endpoints

1. Initiate Chat

Endpoint :

POST <https://stage.api.eyepax.info/rec/whatsapp/sendMessage>

Description:

Initiate a whatsapp chat

Request Body(form-data):

Field	Type	Description	Value
receiver	string	Recipient phone number	94776337406
message	string	Message content	Hello! This is a test message.

Response(example):

```

{
  "chatId": "6KzmwD-3VNOatGJGRlQB8w",
  "message": "WhatsApp message sent successfully",
  "providerMessageId": "rmag3_SqUyqdYgfPWk91Lw",
  "providerMessageIds": [
    "rmag3_SqUyqdYgfPWk91Lw"
  ],
  "receiver": "94776337406",
  "sender": "94706879451",
  "status": "sent"
}

```

2. Get chat history

Endpoint:

GET <https://stage.api.eyepax.info/rec/whatsapp/history>

Description:

Get chat history by passing chat_id as the required parameter and limit as an optional parameter

Params:

Key	Value	Description
chat_id	6KzmwD-3VNOatGJGRlQB8w	Required. The id of the chat related to requested messages.
limit	20	A limit for the number of items returned in the response. The value can be set between 1 and 250 .(an item inside items array is one single message record)

Response(example):

```

{
  "object": "MessageList",
  "items": [
    {
      "object": "Message",
      "id": "cvWVWkpxvips7kGGcmC7w",
      "chat_id": "6KzmwD-3VNOatGJGRlQB8w",

```

```

```

When bot initiates a message, **is_sender = 1**

When a user initiates a message **is_sender = 0**

3. Send message(chat_id)

Endpoint :

POST https://stage.api.eyepax.info/rec/whatsapp/sendMessage/{chat_id}

Description:

Send messages using chat_id

Request Body(form-data):

Field	Type	Description	Value
message	string	Message content	Hello! This is a test message.

Response(example):

```
{
  "object": "MessageSent",
  "message_id": "eNISTAVCUSEc7s3c7xt7Bw"
}
```

4. Listen for webhook

Endpoint:

POST <https://stage.api.eyepax.info/rec/whatsapp/webhook>

Description:

Listening for messages.

Body(json):

```
{
  "account_type": "WHATSAPP",
  "event": "message_received",
  "chat_id": "6KzmdD-3VNOatGJGRlQB8w",
  "timestamp": "2025-12-24T16:45:27.000Z",
